Indianapolis, IN 46278

To whom it may concern:

ESM (Engineered Solutions Midwest), performed integration upgrades to Gahanna's existing SCADA system compiled of: 1 water tower, 2 booster stations, 7 PRV's, and 6 sanitary lift stations. In addition, ESM upgraded the telemetry equipment at the 2 booster stations and the water tower.

The team worked quickly and efficiently despite a handful of road blocks that were encountered. ESM's team took great care in the transitions of the old equipment to the new equipment. The transition was seamless and the communication downtime was unnoticeable.

ESM's team has successfully upgraded our system from a basic on-off system to a smart one that monitors pressures, flow, tank level, and actively adjusts for a multitude of different scenarios. I feel I can speak for our Gahanna team in saying that we could not be happier with our new set-up provided by ESM.

Sincerely,

D. Grant Crawford
